Led Flood Light

SPECIFICATIONS

Electrical Power (W): From 10W to 400W

Voltage (V): 100~277V / 220~240V

Power Factor: 0,95

IP protection: 66

IK protection: 08

Electrical power class: Class 1

Fixation: Screwed on surface. Possibility of fixing on pole up to $\varnothing 64\text{mm}$ with an adjustable support adaptable.

Dimensions(LxWxH)

70W: 292*246*53mm

100W: 292*246*53mm

150W: 336*264*53mm

200W: 407*328*53mm

240W: 407*328*53mm

300W: 496*411*65mm

400W: 496*411*65mm

WARNING

Connection block included. Installation of the luminaire may require the intervention of a qualified person.

PHOTOBIOLOGICAL RISK

The luminaire shall be so placed that a prolonged look at the luminaire don't expected at a distance closer to 3 meters

- The floodlight is designed for outdoor applications in industrial areas, sports courts, facade lighting, etc.
- The floodlight settings are designed to operate at a maximum set ambient temperature of t_a 35°C.
- The floodlight has an adjustable support with a radius of 270° to adapt to the position that best suits the needs of the user.
- The floodlight contains last technology protection screens for greater heat dissipation and greater work performance.

INSTALLATION

1. UNPACKAGING

Unpack the luminaire and check that no part hasn't been damaged. If it finds any damage, keep the luminaire back in the packaging and contact us.

2. HANDLING

If the luminaire is handled incorrectly after removal from the packaging, damage may occur. Don't knock or stack luminaires after removing them from the packaging.

3. INSTALLATION

- Make holes on the surface were be installed to fit the projector bracket to place the screw pins.

	a (mm)	b (mm)	c (mm)	d (mm)	e (mm)
70-100W	121	31	9	13	9
150W	121	31	9	13	9
200-240W	121	31	9	13	9
300-400W	171	31	9	13	9

- Once holes have been made, attach the floodlight bracket to the surface as shown in the following image.

⚠ WARNING

Under no circumstances hang the luminaire directly from the power cable.

- With the support fixed to the surface and proven to be correctly held, place it in the direction that best fits your needs and proceed to the cable connection.

4. WIRING

- Check that the supply voltage is the same as that of the luminaire and are compatible.
- Connect the luminaire to the supply voltage by connecting the cables with their respective colors as shown in the following indications.

⚠ WARNING

The flexible cable or outside cord of this luminaire can't be replaced. If the cable is damage, the luminaire must be destroyed.

Connections

Cable colour:	Supply type:
Brown	Phase
